**SKIN CONTACT:** Wash with soap and water. Get medical attention if irritation develops or persists.

**INHALATION:** Remove victim to fresh air. If not breathing, give artificial respiration. If breathing is difficult, give oxygen. Get immediate medical attention.

**INGESTION:** Get medical attention immediately. Do not give anything by mouth to an unconscious person. Place victim on left side with head down to prevent aspiration into lungs. Call a physician or poison control center immediately for advice on inducing vomiting.

## **SECTION 5 — FIRE FIGHTING MEASURES**

**Flammability classification (OSHA 29 CFR 1910.1200):** Non-Combustible, Non Flammable

**Flash point (Method):** > 200°F

**Auto-ignition temperature:** N/Av.

**Lower Combustible limit (% by vol.):** N/Av.

**Upper Combustible limit (% by vol.):** N/Av.

**Explosion data:** Can release vapors that form explosive mixtures at temperatures at or above the flash point. Empty containers retain product residue (liquid and/or vapor) and can be dangerous.

**Oxidizing properties:** None known.

**Suitable extinguishing media:** Alcohol foam, carbon dioxide or dry chemical.

**Special fire-fighting procedures/equipment:** Containers can build up pressure if exposed to heat (fire). As in any fire, wear a self-contained breathing apparatus pressure-demand (MSHA/NIOSH approved or equivalent) and full protective gear. Apply alcohol-type foam or all-purpose foam by manufacturers recommended techniques for large fires. Use carbon dioxide or dry chemical for small fires. Use water spray to keep containers cool.

## **SECTION 6 — ACCIDENTAL RELEASE MEASURES**

**Steps to be taken in case material is released or spilled:** Extinguish any possible ignition source until the area is determined to be free from fire or explosion hazard. Absorb spill with inert material (e.g. dry sand or earth), then place in a chemical waste container. (See exposure controls / personal protection section) Spilled material should be disposed of according to applicable regulations.

**Special spill response procedures:** In case of a transportation accident, contact CHEMTREC at 1-800-424-9300 day or night within USA and Canada: 1-800-424-9300 CCN725171. If a spill/release in excess of EPA reportable quantity is made into the environment, immediately notify the national response center in the United States (phone: 1-800-424-8802).

## **SECTION 7 — HANDLING AND STORAGE**

**Safe handling procedures:** Handle all chemicals with care.

**Storage requirements:** Keep away from heat, sparks, and flames. Keep container closed when not in use. Store in a cool, dry, well ventilated place away from incompatible materials.

**Special packaging materials:** Always keep in containers made of the same materials as the supply container.

## **SECTION 8 — EXPOSURE CONTROLS AND PERSONAL PROTECTION**

**ENGINEERING CONTROLS:** Local exhaust ventilation may be necessary to control any air contaminants to within their exposure limits.

**RESPIRATORY PROTECTION:** No protection needed under normal use and conditions. Use a NIOSH/MSHA approved air purifying respirator with an organic vapor cartridge when airborne concentrations are expected to exceed exposure limits. Protection by air purifying respirators is limited.

**SKIN PROTECTION:** When contact is likely wear chemical resistant gloves and boots.

**EYE PROTECTION:** Wear safety glasses with side shields or goggles.

**OTHER PROTECTIVE EQUIPMENT:** Emergency eye wash stations and deluge showers should be available in the work area.

**HYGIENIC PRACTICES:** Wash hands before eating. Use only with adequate ventilation. Remove contaminated clothing and wash before reuse.
